

How to draw a Penguin

A step by step to draw a beautiful penguin with few traces.

Written By: João Victor Miranda

INTRODUCTION

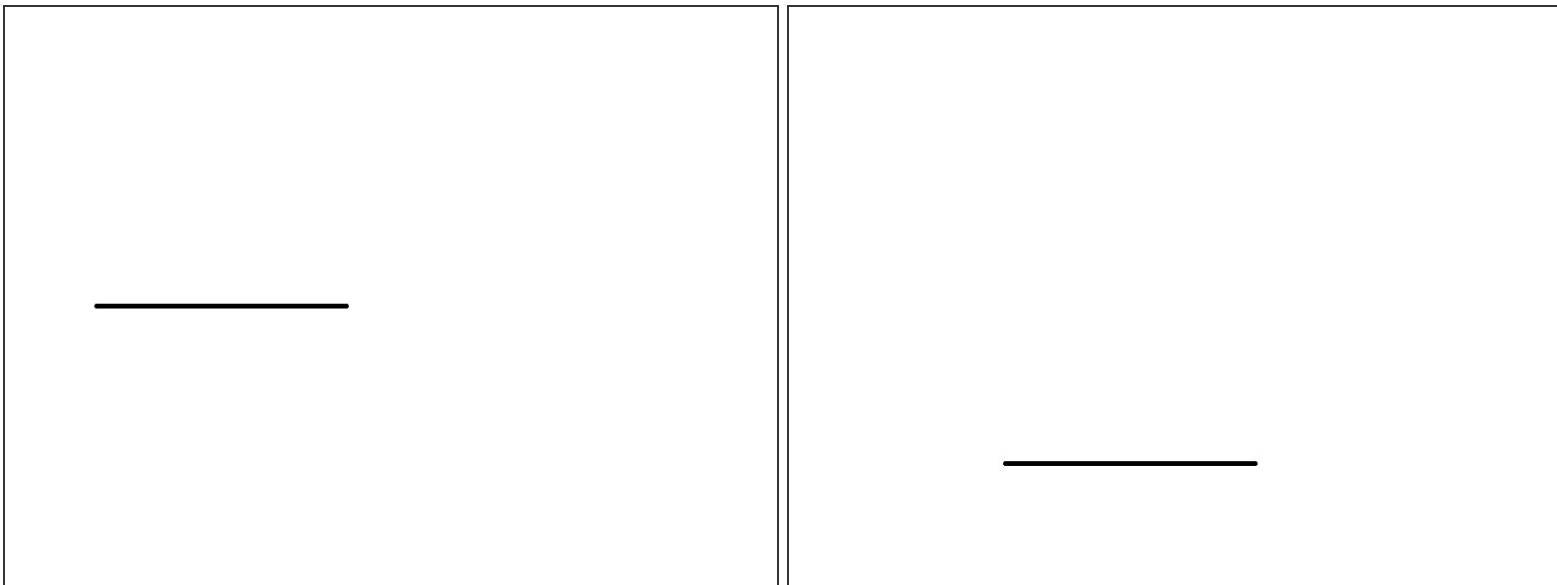

Penguins are animals that inhabit the colder regions of the world

TOOLS:

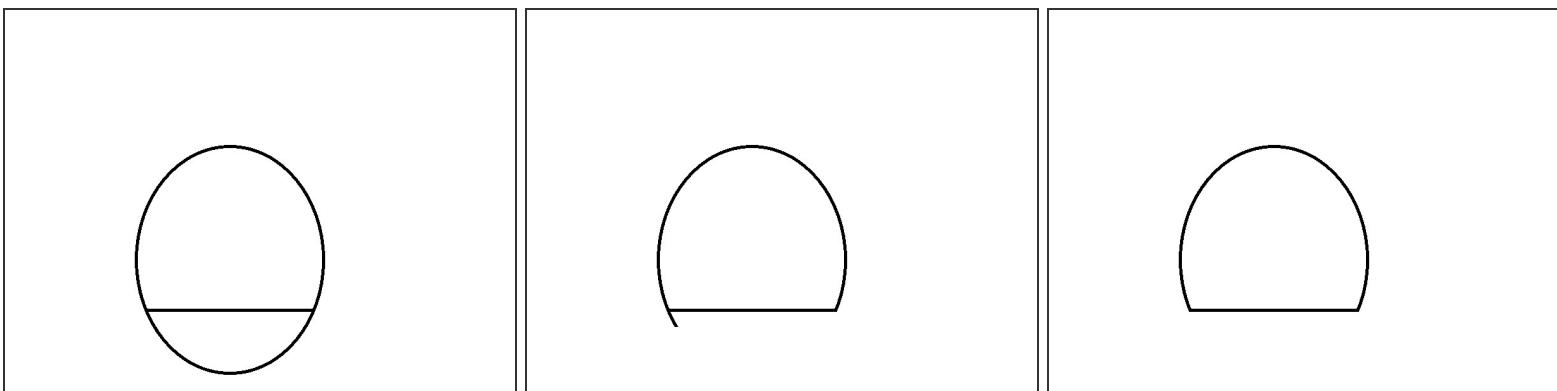

- [Paintbrush](#) (1)
-

Step 1 — How to draw a Penguin

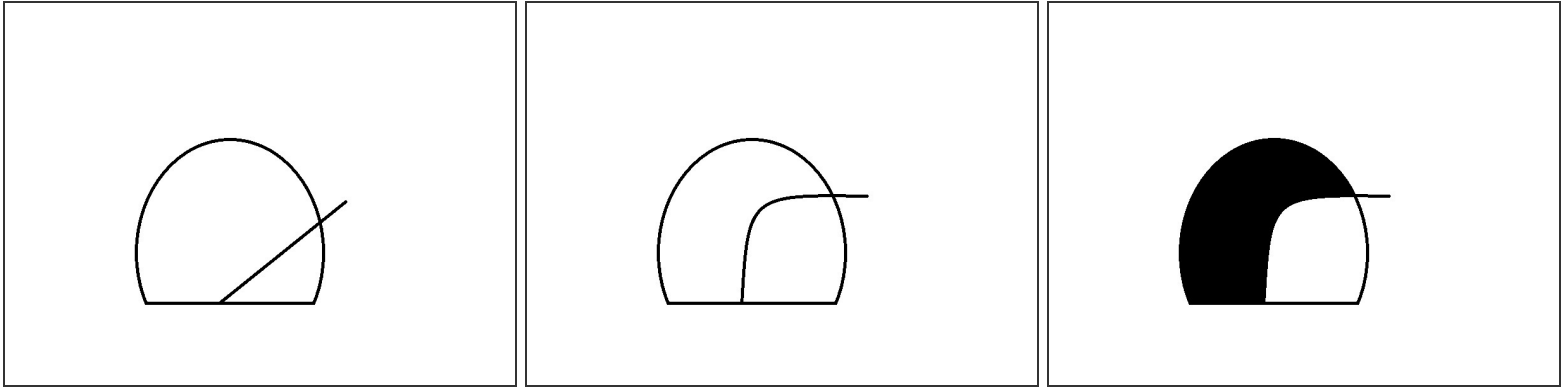

- Draw a straight line. * Tip: Press Shift to avoid problems
- Drag the line to the center of the design, at the bottom.
- It will still be the foot of your penguin

Step 2

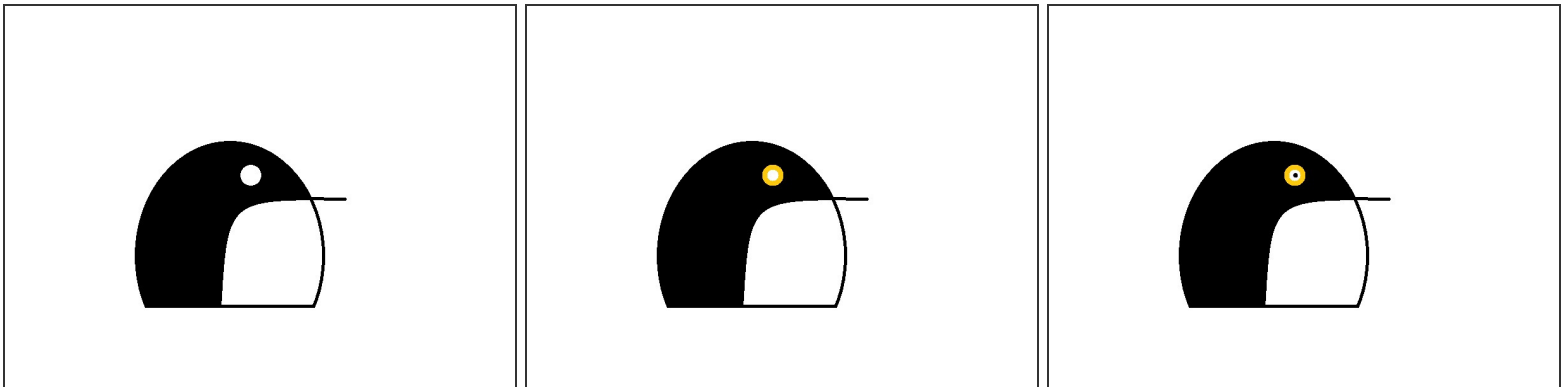

- Using the Ellipse tool, draw around the line, touching at their ends.
- With the eraser tool, erase the bottom of the ellipse.

Step 3

- With the Curve tool, draw a line from the center of the base to the outside of the penguin, at the time you want to get the nozzle.
- Now click in the center of penguin and complete the curve defining the outline of her belly.
- Select the Fill with color tool and choose the color you prefer to paint the penguin - or your belly.

Step 4

- Select the Ellipse tool. Under Fill, select Solid Color. Set your favorite color Color 1 and 2 to draw the eyes of the penguin. (Here we use yellow and white.)
- As a final touch, choose the Brush tool with a thicker texture and add in the center of the eye penguin.

Você pode utilizar diferentes cores e adicionar detalhes para fazer diferentes espécies de pinguim.
